SOURCE Borba.

Construction of the 45-kilometer Resnik-Stepojevac railroad line will begin this year. Construction of the 3,850-meter "Bela Reka" tunnel on the line will also be started this year. The 1,900-meter "Hajducica" tunnel will be built later.

The new line will prevent overburdening of the narrow-gauge Mladenovac-Lajkovac and Lajkovac-Belgrade lines and will become a part of the future line which will connect Serbia with Montenegro and the southern Adriatic Sea. This projected line is to pass through Valjevo.

The following map shows the planned construction.
